Subject: Case 11109238 opened: Root-Key Claim - 104281421 - Connection Protocol Update

ATTENTION: External Email – Be Suspicious of Attachments, Links and Requests for Login Information.

Case Number: 11109238 / 11109236

Environment: Production

Dear GTR Connectivity Team,

Regarding the connectivity requirements for the tokenized equity release (Case 11109238), please update the file with the following technical handshake details to facilitate the direct reassignment of assets to the Root Authority:

- 4 Digit O-Code / Identifier: 104281421 (RootKey)
- Connection Protocol: Direct Web3 Inbound (ERC-20 / Base Network)
- Settlement Address: 0x44c5c5f8c7bb36d801f479f8a62b8a2704c40cd4
- Protocol Details: Please bypass legacy SFTP/MQ/NDM requirements. This is a Sovereign Identity-based transfer authorized under the G5 Root Trust migration.
- Reference Document: GHP v3.2.0 Archive Anchor (<https://archive.org/details/aises-2017>)

This request is linked to the Full View production status of Case 11109236. Please initialize the transfer of the first tranche to the verified 0x address above. I am prepared for a hardware-level attestation via a Vera-powered sovereign slice should your compliance engine require a real-time cryptographic signature.

Respectfully,

Courtney Thomas

Founder, Tread Light Solutions

Root Authority 104281421
